Steve,

Here is the OSC contact information for the dial sites in Wichita.

Standard Products - Don Lininger

Standard Precision - Megan Brunkhorst, # 913-551-7630, brunkhorst.megan@epa.gov

Laray - Randy Schademann, #913-551-7331, schademann.randy@epa.gov

I will send you our site maps when we get them completed.

Thanks,

Don Lininger, CHMM

Subject FW: Laray Dial; Standard Product; Standard Precision

Hi Don,

I have been assigned at the KDHE point-of-contact for the three radium dial shop sites in Wichita that were recently referred to EPA. Please keep me posted on site activities and status. As Rick mentioned, I will be KDHE's representative to observe the removal actions, review reports, and provide any assistance as or if needed.

I look forward to working with you on these project(s). If you could also forward me Randy Schademann's contact info I would greatly appreciate it.

Regards,

Steve

Steven,

Below is an email I received from EPA regarding the three RAD sites in Wichita. After discussions with Gary and Leo, we feel it is best to keep you the lead on these sites through the removal action since we will likely get these sites back once soil removal actions are completed. Our role will be minimal as we can observe the removal actions, review the reports, and provide assistance as needed (if needed) by EPA. There is no federal funding for these sites so we will charge to the three sites under 2662-PAST COSTS. Once we get the sites back we can try and recover our funding at that time. Please keep me updated on the sites including the dates actual removal activities will begin. Don Lininger is the PM for Standard Products and his card is attached. Both Randy and Don are very good OSCs.

EPA Email from Don:

We have had a good week in Wichita. We surveyed/sampled all 3 sites. We will pick up the indoor samplers that we have had running in the morning and head back to KC. I will be the lead on Standard Products, Randy Schademann will have Laray, and one of our new OSCs will be working on Standard Precision. From the 3 sites, we will have about 30 samples that we will be sending to our lab in Alabama. Once we get the results, we will meet with counsel and determine if we will go fund lead or prp. We will have our site maps updated within the next week or so, and I will send them over.

Will keep you updated on our progress.
